## RECYCLABLE MATERIAL PROFILE

## EXHIBIT A

**A. Generator Information:**Company I.D. Number: W2149A

1. Generator: Alaskan Copper Works  
2. Address: P. O. Box 3546  
Seattle, WA 98124-3546  
3. Contact: Mr. Gerald Thompson  
Title: Environmental Assistant

4. Material EPA Waste Code: F006  
5. Generator's EPA I.D. Number: WAD980738546  
6. Generator's State I.D. Number: \_\_\_\_\_

**B. Recyclable Material Characteristics:**

<b>1. Color(s):</b> <u>Brown</u>		<b>6. Texture</b> similar to: <input checked="" type="checkbox"/> Wet Clay <input type="checkbox"/> Dry Clay <input type="checkbox"/> Sand <input type="checkbox"/> Powder <input type="checkbox"/> Other _____	<b>7. Appearance</b> <input checked="" type="checkbox"/> Homogeneous <input type="checkbox"/> Bilayered <input type="checkbox"/> Multilayered	<b>9. Free Liquids</b> (EPA SW 846, Method 9095) <b>Present:</b> <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes
<b>2. Odor:</b> <input checked="" type="checkbox"/> None <input type="checkbox"/> Mild <input type="checkbox"/> Strong Description of Odor: _____				<b>10. Debris</b> <b>Present</b> <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes
<b>3. Moisture:</b> <input checked="" type="checkbox"/> Wet <input type="checkbox"/> Damp <input type="checkbox"/> Dry Percent Solids: <u>23.60</u>		<b>8. Organic Vapors</b> <input checked="" type="checkbox"/> Not Present (<1 ppm) <input type="checkbox"/> Present If present, identify compounds and amount (ppm wet): _____ <input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail		<b>11. Reactivity</b> <input checked="" type="checkbox"/> Not Reactive <input type="checkbox"/> Reactive
<b>4. pH</b> (EPA SW 846, Method 9040/9045) pH: <u>8.12</u>	<b>5. Ignitability</b> (40 CFR §261.21) <input checked="" type="checkbox"/> Pass <input type="checkbox"/> Fail	<b>12. Radionuclides</b> (ASTM D5928-96) <input checked="" type="checkbox"/> Not Detected <input type="checkbox"/> Detected

Mr. Gerald Thompson  
Environmental Assistant  
Alaskan Copper Works  
P. O. Box 3546  
Seattle, WA 98124-3546

Dear Mr. Thompson:

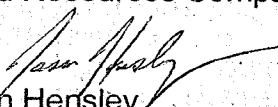

Enclosed for your records is a completed "RECYCLABLE MATERIAL PROFILE" (profile sheet) for the material generated at your facility. In accordance with the recycling Agreement with your company, World Resources Company (WRC) provides a completed profile sheet each contract year.

The concentration of metals reported on the profile sheet is the total concentration of each metal on a dry basis. The recyclable material is prepared for analysis by first grid-sampling and then drying the selected sample in the laboratory oven at 103°-105° centigrade in order to obtain a homogeneous dry sample (Standard Methods For The Examination of Water and Wastewater, 15th Edition, published by the American Public Health Association 1980, Method 209A "Total Residue at 103°-105° centigrade"). Therefore, these results are generally higher than the concentrations of your material as it leaves your facility. You should multiply these dry concentrations by the decimal form of your percent solids (i.e. 50.0% = 0.50) to obtain the concentration of your material as it leaves your plant.

WRC appreciates your business and looks forward to a long and mutually beneficial recycling relationship. Please feel free to call me with any questions you may have regarding the enclosed profile sheet. Thank you for your interest in recycling.

Sincerely,

World Resources Company

  
Jason Hensley  
Laboratory Manager
